

## TECHNICAL DATA SHEET

### 1. TRADE NAME: **MASS®**

Pheromone trap for mass trapping of moths and noctuid moths.

Monitoring device that must be applied to detect regularly the pests' presence in a specific agricultural environment for a defined time.

### 2. PRODUCT CODE: **P-25003INF**

To know the whole range of pheromones (sold separately) that can be purchased with Mass and target insects, consult inFarm's catalogue.

### 3. PICTURE:

### 4. TECHNICAL SPECIFICATIONS:

Mass® is a funnel trap with a collecting bag. The trap is particularly suitable for mass trapping of food moths and flour moths in mills, warehouses, food industries and for several species of noctuid moths attacking horticultural crops.

#### It is composed of:

- 1 funnel trap for the entrance of the pest
- 1 bag for the insect collection
- 1 wire for trap positioning.

**Colour:** As in the picture

InFarm PHERO LINE ISAGRO products could undergo necessary or opportune technical changes, at any given time, without prior written notice to customers.

### 5. HOW TO USE:

Assemble the trap and activate it with the dispenser (sold separately), specific for the target insect to be monitored. Hang one trap per 200m<sup>3</sup>. The positioning should be medium-high (1.80 – 2 m) and away from the walls. In greenhouses, it is suggested to use one trap per 1000m<sup>3</sup>.

## TECHNICAL DATA SHEET
