TECHNICAL DATA SHEET

1. TRADE NAME: ROOF

Monitoring device for detecting the presence of scale insects to be activated with the specific pheromone dispenser (sold separately).

Monitoring device that must be applied to detect regularly the pests' presence in a specific agricultural environment for a defined time.

- 2. PRODUCT CODE: P-25008INF
- 3. PICTURE:

4. TECHNICAL SPECIFICATIONS:

Roof is a monitoring device for scale insects, constituted of a roof with glue in the inner side that must be activated with a specific pheromone dispenser (to buy separately). Place the dispenser distant from the roof to maximise the attractiveness and the catches.

The trap must be used in association with the specific pheromone dispenser, according to the target pest to be monitored: *Aonidiella aurantii, Comstockaspis perniciosa, Planococcus citri, Planococcus ficus, Pseudaulacaspis pentagona, Pseudococcus comstocki.*

It is composed of:

- 9 glue roofs
- 3 supports for pheromone dispensers
- 3 wire to hang the traps
- 1 spatula
- 1 table for catch recording

Colour: As in the picture

InFarm PHERO LINE ISAGRO products could undergo necessary or opportune technical changes, at any given time, without prior written notice to customers.

5. HOW TO USE:

DATE: 10/07/2025 REV N°: 1 MOD: 4.1.2. UK

TECHNICAL DATA SHEET

Set up the trap by positioning the dispenser (to be purchased separately and specific to the target insect to be monitored) using the appropriate support. Hang Roof (trap body and dispenser) at a height of 1.5-2 meters from the ground, preferably in shaded areas.

We suggest you to give a number to each trap and indicate its placement in the monitored area plan, in order to facilitate the check during the periodic monitoring.

Theoretical covered area: in field, it is suggested to place 2-3 traps per hectare for monitoring purpose and 15-20 traps per hectare as auxiliary method in pest management. In greenhouse, it is suggested to place 1-2 traps per area.

Suggested monitoring period: spring season, according to temperature and to the presence of insects.

Suggested frequency of the controls: check the traps regularly, preferably twice a week. Change the pheromone dispenser after 4-5 weeks.

Storage conditions: in a cool and dry room, temperature below 25°C and R.H. below 55%. If well stored (intact packaging), the product shelf life is 3 years.

6. PACKAGING AND SPARE PARTS:

- Packaging:
 3 traps, 9 glue roof. Pheromone dispensers not included
- Spare part:
 Specific pheromone dispensers: available in packs of 3 pcs.

For the full range of dispensers that can be used in association with Roof, please consult the catalogues/contact our commercial department.

7. DISPOSAL CONSIDERATIONS:

Waste disposal should be in accordance with existing Community, National and local regulations.
