

## TECHNICAL DATA SHEET

### 1. TRADE NAME: **ROOF**

Pheromone-based monitoring device for scale insects (*Aonidiella aurantii*, *Comstockaspis perniciosa*, *Planococcus citri*, *Planococcus ficus*, *Pseudaulacaspis pentagona*, *Pseudococcus comstocki*).

Monitoring device that must be applied to detect regularly the pests' presence in a specific agricultural environment for a defined time.

### 2. PRODUCT CODE: **P-25008INFX**

### 3. PICTURE:

### 4. TECHNICAL SPECIFICATIONS:

Roof is a monitoring device for scale insects, constituted of a roof with glue in the inner side and a specific pheromone dispenser to place distant from the roof to maximise the attractiveness and the catches.

The trap must be used in association with the specific pheromone dispenser, according to the target pest to be monitored: *Aonidiella aurantii*, *Comstockaspis perniciosa*, *Planococcus citri*, *Planococcus ficus*, *Pseudaulacaspis pentagona*, *Pseudococcus comstocki*.

#### It is composed of:

- 9 glue roofs
- 9 specific pheromone dispensers
- 3 supports for pheromone dispensers
- 3 wire to hang the traps
- 1 spatula
- 1 table for catch recording

**Colour:** As in the picture

InFarm PHERO LINE ISAGRO products could undergo necessary or opportune technical changes, at any given time, without prior written notice to customers.

### 5. HOW TO USE:

## TECHNICAL DATA SHEET

Set up the trap by positioning the dispenser on the support. Place the trap (roof + dispenser) at 1,8-2 mts height from the floor, possibly in a dark place.

We suggest you to give a number to each trap and indicate its placement in the monitored area plan, in order to facilitate the check during the periodic monitoring.

**Theoretical covered area:** in field, it is suggested to place 2-3 traps per hectare for monitoring purpose and 15-20 traps per hectare as auxiliary method in pest management. In greenhouse, it is suggested to place 1-2 traps per area.

**Suggested monitoring period:** spring season, according to temperature and to the presence of insects.

**Suggested frequency of the controls:** check the traps regularly, preferably twice a week. Change the pheromone dispenser after 4-5 weeks.

The use of the trap in a dusty place could reduce the product functionality in the course of time.

**Storage conditions:** in a cool and dry room, temperature below 25°C and R.H. below 55%. If well stored (intact packaging), the product shelf life is 3 years.

### 6. PACKAGING AND SPARE PARTS:

- Packaging: 9 pheromone dispensers + 9 glue roof (P-25008INFX)

### 7. DISPOSAL CONSIDERATIONS:

Waste disposal should be in accordance with existing Community, National and local regulations.
