3. PICTURE:

4. TECHNICAL SPECIFICATIONS:

CYMATRAP PRO is the pheromone trap for monitoring brown marmorated stink bug (*Halyomorpha halys*), recommended for professional use. The trap is easy to assemble, install and control. It is composed of two separate packs that form a single kit to be assembled, a pair of attractive and aggregation pheromones is also included, they are necessary to selectively catch the harmful insect.

Colour: As in the picture

InFarm – Isagro Phero Line products could undergo necessary or opportune technical changes, at any given time, without prior written notice to customers.

5. HOW TO USE:

It is suggested to install three traps per hectare from the beginning of March. In areas of more than one hectare, install three traps for the first hectare and one for each additional hectare. Place the trap outside on the ground, or on another surface, and at least at 6 meters away from crops, gardens, fruit trees and entrances of buildings.

It is recommended to place CYMATRAP PRO in areas suitable for the development of *Halyomorpha halys*, in particular in the perimeter areas of the crop located near hedges and buildings. Provide additional traps on any sides or at-risk points.

Replace the dispensers after 8-9 weeks after their exposure in the field.

It is recommended to maintain a distance of at least 25 meters between two traps.
