4. TECHNICAL SPECIFICATIONS:

Idrotrap is a water trap for monitoring and mass trapping of *Tuta absoluta*, one of the major pest of tomato. Idrotrap consists of a red tray with an integrated overflow system that controls the water level. Male insects are attracted by the sex pheromone dispensed from the top of the trap and fall into the water.

Colour: As in the picture

InFarm PHERO LINE ISAGRO products could undergo necessary or opportune technical changes, at any given time, without prior written notice to customers.

5. HOW TO USE:

Position the trap at ground level, keeping a distance of 15-20 meters between them.

Fill the trap with water to the indicated level, taking care to add a small amount of liquid soap or vegetable oil.

Idrotrap can be connected to a dripper for automatic refilling or alternatively refilling must be done manually. It is advisable to check the traps regularly in order to eliminate any insects present.

Replace dispenser every 4-6 weeks.

6. PACKAGING AND SPARE PARTS:

- 3 traps + 3 pheromone dispensers

7. DISPOSAL CONSIDERATIONS:

Waste disposal should be in accordance with existing Community, National and local regulations.
