3. PICTURE:

4. TECHNICAL SPECIFICATIONS:

Mass Large for *Popillia japonica* is the specific trap for the monitoring and the mass capture of *Popillia japonica*. It is constituted of two attractant dispensers associated to a funnel trap with collecting bag.

The association of the pheromone-based sexual attractant with the floral attractant allow the trap to catch both adult males and females.

Colour: As in the picture

InFarm PHERO LINE ISAGRO products could undergo necessary or opportune technical changes, at any given time, without prior written notice to customers.

5. HOW TO USE:

Install the device with the two attractants as follows:

TECHNICAL DATA SHEET

It is suggested to place the trap (activated with the pheromone dispenser and the floral dispenser) at minimum 1 meter height and at minimum 10 meters away from the cultures.

For mass trapping, place 15-20 traps per hectare. For monitoring, it is suggested to place 1-3 traps per hectare.

Empty or replace the bag once filled for 2/3, cleaning the funnel to avoid obstruction of the trap. Change the dispensers after 8-10 weeks.

We suggest you to give a number to each trap and indicate its placement in the monitored area plan, in order to facilitate the check during the periodic monitoring.

Suggested monitoring period: especially in the period between May and August.

Suggested frequency of the controls: weekly or more frequently according to the pest infestation level.

6. PACKAGING AND SPARE PARTS:

Packaging:

- Mass Large for *Popillia japonica*:

2 traps including 4 pheromone dispensers, 4 floral attractant dispensers and 6 bags

Spare parts:

- Dispenser *Popillia japonica* 9+9:
